TABLE PROFIT PERFORMANCE BY REGION

Furniture emerged as the weakest performing category despite generating strong sales as seen in executive page . Further analysis revealed that the Tables sub-category is responsible for most of the losses, indicating that high revenue alone does not guarantee profitability.

Impact of Discount Strategy on Profitability

TOTAL ORDERS BY DISCOUNT GROUP (Tables)

sub_category ● Tables

TOTAL QUANTITY BY DISCOUNT GROUP

TOTAL SALES BY DISCOUNT GROUP

TOTAL PROFIT BY DISCOUNT GROUP

discount group	profit margin
High Discount	-39.68%
Low Discount	16.18%
Total	-8.47%

Although high discounts increase customer purchases, they reduce profitability significantly. Low-discount sales generated higher revenue and a positive 16.18% profit margin, while high-discount sales produced a -39.68% margin.

High Discounts are successfully increasing demand, but the additional demand is not generating enough revenue and profit to justify the discounts being offered.

High-Risk Products & Business Recommendations

TOP TEN PROFIT DRAINING PRODUCT

. Reduce excessive discounts on high-risk table products
Products receiving large discounts consistently generated negative profits. A revised discount policy should prioritize profitability over sales volume.

Review pricing strategy for underperforming products
Products repeatedly sold at a loss should be evaluated for pricing adjustments, supplier negotiations, or possible discontinuation.

Focus promotions on profitable products
Instead of applying deep discounts broadly, promotions should target products with healthy profit margins to maximize revenue without eroding profitability.

Risk Level product_name	High Risk			Low Risk	
	Sum of sales	Sum of profit	avg discount	Sum of sales	Sum of profit
Anderson Hickey Conga Table Tops & Accessories	27.00	-14.16	0.40		
Balt Solid Wood Rectangular Table	364.00	-205.71	0.43	211.00	21.1

Balt Split Level Computer Training Table	514.00	-302.48	0.47		
Barricks 18" x 48" Non-Folding Utility Table with Bottom Storage Shelf	363.00	-84.67	0.40	161.00	12.1
Barricks Coffee Table, Adjustable	1,153.00	-1,117.82	0.63	3,443.00	351.8
Total	171,582.00	-111,668.26	0.53	413,367.00	80,039.7

Monitor discount effectiveness continuously
Implement a dashboard to track discount levels, profit margins, and product performance in real time, enabling management to detect profit leakage early

Product-level analysis identified specific table products consistently generating losses under aggressive discounting. Rather than reducing discounts across all products, management should prioritize high-risk items for pricing review and discount optimization.

REGIONAL PROFIT LEAKAGE & STRATEGIC DEEP DIVE

Reduce discounts high discount regions .
Review pricing strategy in South and Central regions.
Set discount approval limits above 20%.
Focus promotions on profitable.
